

ACM Website Building

Meeting 1: Intro 03/26/25

Overview:

- The purpose of the ACM website is to have a place that gives an overview of the club and keeps up with all club activities and resources.

Features of The Website:

- Photo Carousel on the Home Page
- Introduction to ACM (About)
- Meet the E-board Section
- Events Calendar
- Resources (Have a page/part of the page that displays various links/resources (coding, internships, job interview prep., courses) that may be helpful to any Computer Science Student)
- Join The club (include the groupMe link)
- Hackathon Registration (one of the big events of the club, could include a button in events section)
- Links to social media and contact at the bottom of the page

Plan:

- We will be using Github to collaborate and share ideas as we build the website. Each member interested will work on their own branch. Each branch will be assigned a different page on the website.
- Github: <https://github.com/sanstanicole/ACMWebsiteBuilding>
- Github (Create a branch for each member participating in the Web Building)
- Make the Website responsive (Mobile and Web)
- HTML and CSS
- Possibly use (Astro Framework)

Web View Idea:

Welcome to ACM

Level up your coding skills and
connect with other players in tech.
Join our quests, level up your
resume, and get loot (a.k.a. snacks).

Any Questions?
